

# Do you suffer from **type 2 diabetes** and **cardiovascular disease?**

## **Consider Participating in a Research Study**

A nationwide clinical research study is now seeking volunteers with type 2 diabetes and cardiovascular disease. The purpose of the study is to assess whether the investigational study drug improves blood sugar control, decreases fasting blood sugar levels, body weight and blood pressure when added to your existing medication.

All study drug, study-related supplies including a glucometer, monthly testing supplies, and study-related procedures will be provided at no cost to you if you qualify as a study participant.

Compensation may be available for travel and expenses.

**To participate in this study, individuals must meet the following criteria:**

- Males: be 45 years of age and older
- Females: be 50 years of age and older
- Have type 2 diabetes mellitus (not type 1 or diabetes insipidus)
- Be diagnosed with cardiovascular disease
- Have uninterrupted anti-diabetic treatment for at least eight weeks prior to enrollment
- Attend 14 study visits in just over a year, averaging about one visit per month
- Monitor your blood sugars using the glucometer provided by the study team and perform blood sugar testing at the frequency instructed
- Take the study drug as instructed
