

# Do you suffer from **GOUT ATTACKS?**

**Local doctors are now conducting a medical research study in gout to evaluate the effectiveness and safety of an investigational medicine.**

If you have gout, you may be eligible to participate in the PRE-SURGE 1 study, evaluating an investigational medicine for preventing acute gout flares in select patients. Researchers are interested in determining the effectiveness and safety of the investigational medicine when used in combination with an FDA-approved medicine commonly used for gout treatment.

**To be considered for participation in the PRE-SURGE 1 study, you must:**

- Be 18-80 years of age,
- Have experienced at least 2 gout flares in the past year,
- Be able to receive treatment with allopurinol, AND
- Not currently be experiencing a gout flare.

The investigator will work with you to determine whether you qualify for the study, using a more comprehensive list of criteria.

Qualified participants will receive study medicine as well as study-related medical evaluations at no cost. Reimbursement for time and travel may also be available.
