

INDIANA HEALTH STUDY

Help us make Indiana healthier for generations to come.

Here's what we're doing.

The Indiana Health Study is collecting information about the population of Central Indiana as a way of helping to make our community healthier. The Indiana Health Study will allow researchers to learn more about chronic diseases such as heart disease, diabetes and cancer that are common in our community. It may also lead to better ways to prevent, diagnose, and treat these diseases. The success of the Indiana Health Study depends on your participation.

People with chronic diseases as well as people who do not have chronic diseases are needed for the Indiana Health Study.

Here's how it works.

Here's how to participate.

If you are interested in participating in the Indiana Health Study, please call info@indianahealthstudy.org.
