

When your **TYPE 2 DIABETES** is out of control, finding *harmony* is essential.

If you're having trouble controlling your diabetes, consider participating in **HARMONY**, a research study evaluating an investigational diabetes medication that's taken **only once a week**.

Even when you follow all of your doctor's instructions, your blood sugar levels can still be difficult to maintain. And, the inconvenience of multiple daily doses required by other medications can often disrupt your daily routine. Now, the **HARMONY** program is evaluating the effectiveness of an investigational type 2 diabetes medication, which could require less frequent dosings than many current treatments.

TYPE 2 DIABETES RESEARCH

Local doctors are currently evaluating the effectiveness of an investigational diabetes medication that's taken **only once a week**.

To be eligible for the **HARMONY** program, you must be:

- 18 years of age or older,
- diagnosed with type 2 diabetes, AND
- having trouble controlling your blood sugar levels.

Qualified participants will receive study treatment as well as study-related medical evaluations and tests at no cost.
